EDUCATION

University of Engineering and Technology, Lahore — 2023 – 2027
Bachelor of Science in Computer Science — **CGPA 3.73 / 4.0**
Relevant Coursework: Artificial Intelligence & Machine Learning · Data Structures & Algorithms · Object-Oriented Programming · Database Systems · Programming Fundamentals

WORK EXPERIENCE

University of Engineering and Technology, Lahore
Teaching Assistant — January 2025 – June 2025
Mentored 40+ students in Object-Oriented Programming and Database Systems (MS SQL Server, MySQL).

Al-Khwarizmi Institute of Computer Science (KICS)
Research Assistant — February 2026 – Present
Developed image segmentation workflows using Python and OpenCV
Performed data annotation and validation using ArcGIS Pro.
Applied computer vision techniques for feature extraction and analysis

PROJECTS

SarcasmSense *github ↗* — Python · HuggingFace · DistilBERT · FastAPI · Gradio
AI & Machine Learning · Natural Language Processing
- Fine-tuned DistilBERT transformer model on sarcasm-labeled datasets to classify sarcasm in text with high accuracy.
- Built a FastAPI backend exposing a REST inference endpoint and an interactive Gradio demo for real-time testing.

Job Market Intelligence System *github ↗* — Python · NLP · Web Scraping · Pandas
AI & Machine Learning · Data Intelligence
- Built an NLP-powered pipeline that scrapes job listings and extracts real skill-demand signals from the market.
- Surfaces actionable intelligence to help job seekers understand what employers actually require.

Trek — Version Control System *github ↗* — Python · CLI · Systems Programming · File I/O
Developer Tools · Systems Engineering
- Implemented a fully functional VCS from scratch — commit history, branching, diff tracking, and file staging.
- Demonstrates deep understanding of version control internals and low-level systems design.

Email Assistant *github ↗* — Python · AI · NLP · Automation
AI & Automation
- AI-powered assistant that drafts, summarizes, and automates email workflows to reduce manual effort.

TEACHNICAL SKILLS

Programming	Python, JavaScript, C#, C++, OOP, DSA
AI & ML	Python, HuggingFace Transformers, DistilBERT / BERT, FastAPI, Gradio, scikit-learn, NLP, Pandas
Web Dev	HTML, CSS, JavaScript, WordPress, REST APIs, Responsive Design
Tools & Systems	Git, GitHub, Web Scraping, Linux / CLI, Data Analysis, Version Control Systems
Databases	MongoDB, MS SQLServer, MySQL
Soft Skills	Team Collaboration, Adaptability, Time Management, Communication Skills

CERTIFICATIONS

SQL — Advanced	*HackerRank · Verified*	Problem Solving — Basic	*HackerRank · Verified*
Python — Basic	*HackerRank · Verified*	Generative AI Application Developer	*ULEFUSA · Top Performer*
PMI Agile	*PMI Kickoff*	PMI Predictive	*PMI Kickoff*

ACHIEVEMENTS

— **ITEC 2024 Quiz Competition — Winner** · UET Main Lahore
— **CALICO Spring 2026 Participant** — UC Berkeley Competitive Programming Contest
